COLEMAN PEBBLES

Happenings of Interest in and

Around this Bustling Town.

You are Talked About

Miss Nettie McIntyre is visiting

friends in Fernie and Nelson.

WANTED—Table and lodging board-

ers at "The Boarding House."

Geo. Gage assisted at the C.P.R.

station for a few days in the absence of

the agent.

Cigars that please can be had at the

Coleman Drug Store. All the best

brands and flavors. Try them.

Miss McIntyre's millinery depart-

ment will be open in the afternoon

only during the month of July.

T. B. Smith, went to Calgary on Mon-

day night, returning this morning.

O. W. Benedict, wife, two children

and Miss Russell left for Calgary,

to visit the Dominion fair.

Our popular druggist and secretary

of the Board of Trade, H. A. Parks,

spent several days in Fernie last week.

Rev. J. Sergeant, pastor of the Baptist

church, will preach next Sunday

morning in L.O.O.F. hall, at 11 o'clock.

Mrs. Charles Dunlop left on Tuesday

for Calgary to visit the Dominion fair.

She will also visit Mrs. A. Beck at Ta-

ber.

A. C. Flumerfelt of Victoria, B.C.,

president of the International Coal &

Coke Co., spent Saturday and Sunday

in town.

H. N. Galer, of Spokane, Washing-

ton, vice-president of the International

Coal & Coke Co., spent Saturday and

Sunday in Coleman.

J. M. Hill and Mr. O'Driscoll, formerly

merchants in Coleman, have gone to

Vancouver with the intention of

going into business.

Mr. and Mrs. Whitaker, brother-in-

law and sister to our esteemed post

master, D. J. McIntyre, spent the hol-

iday in town. They returned to Fernie

on Thursday.

Bert White had the misfortune to

get his left hand badly cut on Wed-

nesday evening. A bottle of ginger

beer exploded in his hand. The wound

required several stitches.

D. J. Hill, of the Coleman "Hard-

ware Co., is in Calgary attending the

institution of the Grand Lodge of Al-

berta, Knights of Pythias.

Mrs. Jobbitt, teacher in the public

school, left on Saturday night for her

home in Lindsay, Ontario. Mrs. Job-

bitt's father may accompany her back

to Coleman after the holidays.

J. P. Foran, treasurer of the Inter-

national Coal & Coke Co., returned

home on Thursday from Spokane,

COLEMAN'S BIG DAY

Fine Day, Fair Crowd, Good Sports,

Enjoyable Ball. Every Thing

Passed Off Well.

Wednesday, the 1st of July, was a

bright and lovely day, just what was

wanted for the Dominion day celebra-

tion. The crowd was not as large as

was expected, owing to there being

other big demonstrations at Crow's

Nest, Fernie and other towns closely

situated. The Foot Ball Club, under

whose auspices the celebration was

given up, deserves nothing but the

highest praise for the manner in which

the whole day's proceedings were car-

ried out. Special mention should be

made of Messrs. A. M. Morrison and

Wm. Chalmers, who worked unceasing-

ly during the day. All the other

members of the Club also worked with

will and energy in getting the grounds

in shape and otherwise assisting in

putting up the fence, and numbers of

other jobs too numerous to mention.

The boys take this opportunity to

thank the coal company for loaning

them the brattish cloth for the fence.

The sports started within a few

minutes of the advertised time, which

is unusual in such cases. The list of

sports was lengthy and lasted all day,

the last one being completed before

dark. The only accident occurring to

mar the day's proceedings was the un-

fortunate affair of D.C. Greaves. When

he was going through a barrel his left

hand was terribly lacerated by a nail.

He was taken to the surgery and had

six stitches put into his hand. If it had

not been for the prompt action of A.

E. Knowles, Mr. Greaves might have

bled to death. The blood came out of

his hand in a stream, two arteries be-

ing torn and one of the cords of the

palm. Orders were given to have the

nails taken out of the barrels, but they

were not all taken out, hence the ac-

cident. The management who gave the

orders to have the nails removed

deeply regret the accident to Mr.

Greaves.

The sports were much enjoyed by

all, as everything passed off to the

satisfaction of everyone. The prize

winners were:

Boys' race, 1st, Edwin Neil.

Boys' race, 2nd, Jesse Wilson.

Little boys' race, 1st, Wm. Gate.

Little boys' race, 2nd, Geo. Johnston.

Girls' race, 1st, Janet Steve.

Girls' race, 2nd, E. Ogden.

Little girls' race, 1st, L. Brennan.

Little girls' race, 2nd, Mabel Lefley.

Miners' 100 yards race, 1st, And. Leam-

ont.

McKinnon, K. P. Stewart, D. A. Mc-

Kenich, E. P. Tucker, E. R. Olmstead,

H. W. McCauley, D. McDonald, H.

Olin, A. Mayne.

M. B. Stitt was a good referee, and

with the exception of a few little dis-

agreements, all seemed pleased with

his work.

The starter of the small sports was

J. McMillan, and he looked rather

dangerous with the pistol, neverthe-

less, he was not as dangerous as he

looked, and all expressed themselves

as pleased with his fairness.

The Coleman brass band contributed

some splendid selections towards the

day's amusement, which enlivened the

proceedings to a great extent. The

boys did well, and Coleman can now

boast of a first-class band.

The committee had some difficulty

in keeping the crowds back of the

field when the plays were in progress,

but this is always a difficult matter,

and the committee did their best. It

would be much better, however, if the

people for their own good, would give

the committee less bother.

The sports on the whole passed off

well and without a hitch, which shows

that the men who took hold of the

affairs of their business, and are

good sports.

As a result of the celebration A. M.

Morrison, secretary, and the other

members of the committee

deserve great credit for the successful

manner in which the ball was held.

The music was excellent and sounded

splendid in the new hall. The gentle-

man supplying the same were: Prof.

H. White and R. Richardson, piano,

and Prof. J. McMillan, violin. The

hardwood floor was a luxury to dan-

cers in the Crow's Nest Pass, and they

all appreciated it. D. G. Stauffer, the

electrician, installed twenty 16-candle

power lights, which lit up the hall

beautifully. These lights will be re-

placed by chandeliers when they ar-

rive. The ball was a grand success

and everyone enjoyed it to the full.

It was not till 2:30 in the morning that

the "Home, Sweet Home" waltz was

played, which ended a most success-

ful Dominion day celebration in Cole-

man.

Pelletier Sub-Division

On Thin Ice

By JAMES NORTON.

Copyright, 1908, by the Associated Literary Press.

When the letter from Aunt Salina was received announcing that she would arrive on a visit the next week, mother and daughter looked at each other for a long minute, then the former said:

"We must keep it from her."

"Yes."

"If we don't she will certainly talk right up to the deacon and make things worse than ever. Your Aunt Salina is not afraid of any living man. You just act as natural as you can, and don't let her catch on to a thing."

And yet five or six days later, when the guest in question arrived, she had not been in the house half an hour before she set her jaw and said to Mrs. Thompson, her widowed sister:

"Now, Ruth, while Mary is upstairs I want to hear about it. There's some skulduggery being going on here, and I want to get to the root of it. It's no use to put on that innocent look, for I'm a woman that can't be deceived."

Then the widow had to fix it up. Her daughter Mary, now twenty years old, had been "keeping company" with Deacon Bromley's son James, and the marriage had had once been set. Deacon Bromley had then, however, the widow said, "faded the match."

The widow had a firm opinion on this matter, and she was sure that the young folks would have a good start in life. She as well as he could also contribute considerable cash toward building the new house and barn. Yes, it would be a good match all around, and everything was going swimmingly when the deacon took in a summer boarder.

He was what might be called a half cash boarder—that is, for two weeks he paid half the price of board and lodging in cash and the other in information which changed the deacon's nature all over. The boarder had made a study of family trees, so he asserted, and after searching his head and consulting the signs in the family manuscript for a fortnight he announced that the Bromleys were direct descendants of Lord Bromley of England, while Lord Bromley himself was a grand-nephew of William the Conqueror.

The deacon had always been rather a stiff necked man toward the community, and this information added to his pride. He did not question the stranger's information, and from that time it began to get in its work. He wasn't rich, but he had the blue blood in him, and that was even better. In four weeks he was well on his feet, and had a poker down his back, and at the end of four more he said to his son:

"James, there is nothing that bursts a family more than a fall in the social ladder. It will be no use to me when I hear that a Bromley has married a Thompson."

"Are you talking about Mary Thompson, father?" asked James.

"I am. I am seeing things a great deal different from what I did a few weeks ago. Where did the Thompsons spring from? Who are they? Was the first Thompson a lord or a duke or only a cooper?"

"But, you know, I'm engaged to Mary Thompson, and you know that the family is really a great deal different from what I did a few weeks ago. Where did the Thompsons spring from? Who are they? Was the first Thompson a lord or a duke or only a cooper?"

"But, you know, I'm engaged to Mary Thompson, and you know that the family is really a great deal different from what I did a few weeks ago. Where did the Thompsons spring from? Who are they? Was the first Thompson a lord or a duke or only a cooper?"

A direct descendant of Lord Bromley and through him of William the Conqueror, the deacon did not consider it derogatory to his dignity to make a rush for the head of a barrel appearing above the ice. He dared not go back and he dared not go forward, and he shouted for someone to come and shove a plank out on the ice to save his blue blood from being chilled.

"My soul, but there's Deacon Bromley standing on that barrel in the middle of the gulches," exclaimed the widow as she heard the shouts and looked out of the window.

"It's Providence," answered Aunt Salina, "and now you keep hands off Providence and I am going to run this show. Get my hood and shawl and mittens, for the conversation may last some time."

Five minutes later she stood on the bank of the pond, sizing the deacon up, and after a bit she said:

"I am Mary's Aunt Salina from Michigan, and here on a visit from Michigan. May I ask you to kindly bring me here and shove it out on the ice?"

"What? What?" exclaimed Aunt Salina as she stared at him. "Sir, I want you to know that I was a Thompson before I married."

"Yes?"

"And how dare you, sir—how dare a Bromley ask Thompson to drag his ass out of his hole—insult—insult to our blood!"

"I didn't mean it so. I didn't know—I never heard that the Thompsons had—"

"Had any blood at all, you mean, sir? Another insult! Who do you think you are, sir?"

"You may have heard of Lord Bromley of England," queried the deacon, trying to look dignified, but making a failure of it, as any man must have done, perched in the center of a goose pond.

"Yes, sir, I have and with good reason. He stole a horse from a Thompson and was hanged for it!"

"On—you—were—"

"In the next generation two Bromleys were branded on the palms of their hands for cattle stealing. In the third one of them went to prison for arson. In the fourth one of them was the castle of a Thompson."

"Can it be possible?"

"And in the fourth, fifth and sixth generations the Thompsons got together and have retained and drove all the Bromleys out of the country, and the king rewarded them for it. Is it possible that you never heard that Lord Cromwell, the great conqueror, and history tell you that the Duke of York was a Thompson? Why, man, there isn't a noble in England today that isn't a Thompson first. He had to be."

"I have been told that I descended from William the Conqueror," faltered the deacon, as he felt that he had lost his case.

"But, you know, I'm engaged to Mary Thompson, and you know that the family is really a great deal different from what I did a few weeks ago. Where did the Thompsons spring from? Who are they? Was the first Thompson a lord or a duke or only a cooper?"

"But, you know, I'm engaged to Mary Thompson, and you know that the family is really a great deal different from what I did a few weeks ago. Where did the Thompsons spring from? Who are they? Was the first Thompson a lord or a duke or only a cooper?"

APPEAL TO THE KING.

Judges Consider Petition to His Majesty From Ceylon.

A remarkable appeal to the King from a sentence of death was subsequently commuted to twenty years' imprisonment, coming from Ceylon, was recently considered by a judicial committee in London.

The judges taking part were the Lord Chancellor, and Lords Ashbourne, Manchester, Robertson, Alington, and Collins.

The petitioners were two Cingalese ladies, named Loku Nona and Panchi Nona, and their servant, Waitan, a boy, aged 14, whose alleged offense was the murder of a maid, named Carina, at Talahena, Ceylon, in July last.

The trial of the accused took place at Colombo in November last and lasted eleven days—a jury of seven—by a majority of six to one—convicted all three defendants.

Mr. Justice Remont, at the request of the prisoners' counsel, stated a case for the consideration of the Supreme Court, who upheld the conviction and sentence.

His Majesty was now asked to grant special leave of appeal on the grounds that the injuries alleged to have been inflicted by the accused were not proved by the evidence, and that there was no legal evidence to warrant the conviction.

The story for the prosecution was that on the night of July 31, at about ten, Loku Nona, with a club handed to her by Peregrine (a manservant), struck Carina, a girl of about 18, on the head; that Carina fell, crying "Amma" (mother), that Panchi Nona then struck Carina on the head, and that Loku Nona then took Jane—a servant girl about 14—to bring a knife.

Jane then brought a knife from the kitchen, and gave it to Loku Nona, who handed it to Panchi Nona, saying, "Cut her throat," while Waitan held his hand over Carina's mouth. Panchi Nona inflicted a cut with the knife on Carina's throat, and Carina then lay still, apparently dead, and that shortly afterwards Carina's body was carried away towards the shore, to be thrown into the sea.

According to the medical evidence the cut on the throat was not fatal, and that the death was the result of concussion of the brain, produced by some blunt instrument like a club. Four distinct contusions were found by the doctor who made the post-mortem examination.

Sir R. Finlay, in laying the petition before the king, said the only witness who deposed to having seen the alleged murder was the servant Peregrine, who had been bribed by the accused to give false evidence, because, if true, she was an accomplice; her testimony was not corroborated, and the evidence was contradicted by other evidence. The girl had given two contradictory versions of what she had seen, and had suppressed facts, and neither was she confirmed by a single witness. What was the alleged motive for this brutal murder—if murder it was?

The accused, Panchi Nona, aged 28, was said to have been seen by Jane and Waitan, who were both present, because Carina had talked freely about the matter, the suggestion was that Panchi Nona had determined to murder her. All these statements were falsified by medical testimony.

The Lord Chancellor, at the close of the argument, announced that the committee would advise His Majesty to give leave to appeal, and that their lordships would be prepared to hear the appeal as soon as it was ready.

Any application to mitigate the rigor of the punishment or to admit the accused to bail, pending the appeal, was said to be addressed to the authorities in Ceylon.

A Hero's Return.

Memories of stirring scenes are recalled by Mr. John Green, who has been for many years stationmaster at the Victoria station of the South-Eastern and Chatham Railway, and who has served the company for 44 years.

Naturally enough, seeing how often royalty use Victoria when traveling to the continent, Mr. Green has seen a good deal of the reigning family, and quite recently he was introduced to both the King and the Prince of Wales.

Of all the exciting scenes that Mr. Green has witnessed, he gives the palm to the arrival of Lord Kitchener (then Sir Herbert Kitchener) when the South-Eastern and Chatham Railway, and who has served the company for 44 years.

"The enthusiastic throng broke through the barriers which had been provided by the station staff, and police and soldiers were swept off their feet. Lord Kitchener was literally carried away by the crowd, and it was only several policemen helped him to reach another exit, where he escaped in a hansom."

Human Heads as Garden Border.

An acknowledgment was given recently by Sir John Green, the stationmaster at the Victoria station of the South-Eastern and Chatham Railway, and who has served the company for 44 years.

"The enthusiastic throng broke through the barriers which had been provided by the station staff, and police and soldiers were swept off their feet. Lord Kitchener was literally carried away by the crowd, and it was only several policemen helped him to reach another exit, where he escaped in a hansom."

Woman's World

Whose Husband Has Given Her a Palace For the Housing of Cripples.

One of the most beautiful and most magnificent palaces in England has been turned into a factory to make the world in which it is situated a more comfortable place.

Recently the various projects and enterprises which she has forwarded threatened to overwhelm her, and she decided to turn her pet philanthropy into a business. She organized a company which she called the Duchess of Sutherland's Crippled Guild, limited.

Perhaps it was the duchess' charm, perhaps it was the warning in the

The woodpeckers sleep resting upon their tails, even the ducks habitually following this custom, although during the day the ducks sleep much of their time perching in passive manner, crosswise upon a twig. Small birds, such as thrushes and warblers, sleep usually upon some small twig, with heads tucked behind wings in orthodox bird fashion, but they occasionally vary this in a restless manner by clinging all night to the vertical wires of their cages, sleeping apparently as soundly in this as in the usual position of rest. A bluebird in a small cage slept thus about one or two nights out of each week. Any explanation of this voluntary and widespread habit among perching birds would be difficult to suggest.

The little hanging parakeets derive their name from their custom of sleeping always in a reversed position, and when distributed over their roosting devices, they resemble some strange, pondant, green fruit rather than sleeping birds.—Outing Magazine.

THE BLUE JAY.

Why Should He Be Selected as Sand Bearer to Satan?

It is said and believed by many that all the blue jays disappear every Friday, and that they do not return until next day, and this disappearance is accounted for by the statement that the birds are under a compact with Satan and that they devote each Friday to diverting him from his duty of sand to heat his caldron at the point of torture.

But why should the blue jay be selected as sand bearer to Satan when there are so many birds of stronger and fiercer wing? There are many superstitions that have a reasonable basis, but this particular one has nothing to recommend it.

The origin of it lies in the fact that the blue jay is a most particular home builder. He knows how to build his house, and he takes much pride in it. He doesn't hang his nest to a limb nor glue it to a tree.

Instead he selects a substantial fork or crook in a tree, and he builds a nest of good size and strength, and on these he superimposes a strong foundation of clay, with layers of papers between, and when his nest is finished he is ready to lay his eggs.

Thus fitted and finished, it is admirably adapted to the rearing of a strong and healthy brood, and at any time he is ready to defend his nest.

None is so quick to answer a bird who is sent to him to a reception at the house after the marriage. It is customary if this is in the daytime to leave a visiting card, and at any time he is ready to defend his nest.

BLAIRMORE

H. E. Lyon is in Calgary attending
the Dominion fair.

BORN—On June 22, to Mr. and Mrs.
L. P. Duff, a daughter.

Mrs. Thomas Hills is attending her
sister at Lillo, who is ill.

BORN—On June 18th, to Mr. and
Mrs. H. Kanouse, a son.

H. Matheson, the pioneer coal man,
is getting on very successfully with
the development work at his mine
west of Coleman.

Councillor Prior has commenced to
build a new house in front of the pub-
lic school. From the present appear-
ance it will be a fine residence.

Constable Holman of the R.N.V.
M.P., had a bad fall from his horse
here on Tuesday. He received severe
injuries to his head, and had to be
bandaged up.

Dan Sinclair, of the firm of Frier &
Sinclair, has joined the noble army of
benedicts. The many friends of Mr.
Sinclair wish him and his bride a long
life and every happiness in their new
sphere of life. A new house is being
erected for the happy couple.

Rev. C. C. McLaurin, general mis-
sioner for the Baptist convention,
preached a powerful and interesting
sermon last Sunday evening in the
mission church, from the text: "What
must I do to be saved?" The building
was filled with an appreciative con-
gregation.

An open air service was held on
Tuesday evening, when the members
of Frank Christian Endeavor were
present. The speakers were: H.
Haddon of Frank, Rev. J. Sergeant of
Blairmore, Mr. Howarth of Frank,
a member of the Brethren, and B.
Gibson of Calgary. The service was
organized by pastor Odel, who opened
and closed with prayer. A good crowd
was present who listened with rapt
attention.

WANT AREA OF PRE-EMPTION EXTENDED

In the house last week Mr. Oliver
gave notice of amendment to increase
the pre-emption area by three or four
million acres, making in all about 12-
000,000 acres. The new boundaries are
more regular, the added portions being
the northeast and northwest corners,
situated in the provinces of Alberta
and Saskatchewan. John Haddon of
Pincher appealed for the extension of
the nine square miles in which the home-
steader may hold his pre-emption.
He wanted the pre-emption area itself
enlarged to take in more of southern
Alberta, the people of which, he ex-
plained, had done much to build up
Canada.

PINCHER CITY

Crops are doing fine.

Water now in abundance.

H. Ryan is in Lethbridge this week
on a business trip.

A. A. Dink of Calgary, is here on
business this week.

Ask your druggist for "New Life,"
the world's greatest guaranteed cure
for indigestion.

A large number from this place are
taking in the Dominion exhibition at
Calgary this week.

The Alberta Pacific Elevator Com-
pany shipped quite a number of cars
of hay on Monday.

Ask your druggist for "New Life,"
the world's greatest guaranteed cure
for indigestion.

Quite a number from this place at-
tended the ball given by B. L. Griffith
at Cowley last week.

Tom Campbell has gone to Calgary
on a horse hunting expedition. He
has a number of good horses on the
range in that district.

Don't forget the strawberry social
and band concert July the 15th, on
the Methodist church lawn. A good
time is assured. Watch for posters.

W. H. Read is making good head-
way in erecting the veranda in front
of the Alexandria hotel. When com-
pleted this will make a marked im-
provement in the appearance of the
splendid building.

Rev. W. R. Seeley and wife left
Monday morning for their new charge
at Cardston. They are driving the
greater part of the way, calling on
friends at Spring Point, Claresholm,
Granum and Calgary.

Posters are out for the grand cele-
bration to be held at the South Fork
Canyon at Mountain Mill, on Thurs-
day, July 10th. The Mountain Mill
Sports Club are offering \$700 in prizes.
Numerous horse races and several foot
races are enumerated on the pro-
gramme, a polo match between Pin-
cher Creek and the North Fork, for a
silver cup, value \$50, foot ball open to
Crow's Nest Pass for cup valued at \$50,
base ball open to Crow's Nest Pass for
cup valued at \$50. Base ball, foot ball
and polo matches start at 11 o'clock.
Meals will be provided on the grounds.
There will be a grand ball at night.

The new ferry over the Old Man's
river was launched on Wednesday,
June 24, and is now in good working
order and a great improvement over
the old one, which was too small and
unreliable. In celebration of the event
a picnic was organized by Mr. Elliott
and a large number from Summerview
and Pincher City were in attendance.
Fishing was not good on account of
the river being high, but all enjoyed
themselves. Quite a number of foot
races were pulled off, which afforded
much amusement, and during the
evening there was dancing on the
ferry to the tune of some good
music composed of two violins and a
mandolin.

FRANK

Dr. McKenzie of Bellevue, has gone
to Calgary to the Dominion fair.

The big coal screen imported by the
C. A. C. & C. company, is about in-
stalled and mining operations will be
commenced about next Monday.

Dr. Bruce, dentist, of Macleod, has
opened an office here permanently in
the Mercantile block, J. B. Ellis,
D.D.S., will be in attendance daily.

The Hill Crest C. & C. company, of
Hill Crest, has resumed work with
about 150 miners. The company have
received an order from Spokane for
10,000 tons of coal. Lillo and Bellevue
collieries are making full time.

George Somerton, the enterprising
jeweler, has gone to Montreal for a
three weeks' business trip. Mr. Som-
erton's brother is looking after the
business during his absence. On his
return it is in Mr. Somerton's inten-
tion to open a branch jewelry estab-
lishment at Lethbridge, B.C. His many
friends here will wish him every suc-
cess in his new venture.

Michael Murphy of the C. P. R. yard
staff, and Miss McLeod, one of the
Frank's popular young ladies, were
married Tuesday last. The Rev.
Father Lajot performed the ceremony
when only a few intimate friends of
the bride and groom were present.
Mr. and Mrs. Murphy will reside in
town, and have taken up house keep-
ing. Their many friends wish them a
long and happy journey through life.

An Italian, Zyeto by name, was ar-
rested in Fernie on Monday by Sergt.
Haelett, of the R.N.W.M.P., and
brought to the police barracks hand-
cuffed. His offence was that a year
ago last October while employed by
the C. C. Co., of Lillo, he got into an
altercation with one Donahue, and in
the melee stabbed him and imme-
diately skipped the Pass, and detec-
tives have been hunting for him ever
since. The preliminary trial took
place on Tuesday before Inspector
Belcher and E. Disney of Coleman.
The prisoner was sent to Macleod to
stand his trial. Zyeto thought he had
escaped the police, but they had not
forgot him. The way of the trans-
gressor is hard.

HARVEST IN ALBERTA

STETTLE, Alberta, June 30.—On
Monday last N. W. Harrington, 22
miles southwest of here, commenced
harvesting operations by cutting a splen-
did 110-acre crop of fall rye. The crop
was over thirty inches high and showed
splendid head.

Mistress: "Jane, I saw the milk-
man kiss you this morning. In the
future I will take the milk in." Jane:
"Twouldn't be so use, mum. He's
promised never to kiss anybody
but me."

The Real Man

By MARTHA COBB SANFORD.

Copyright, 1928, by Associated Literary Press.

Polly was to take part in an amateur play. "It's such fun," she announced on the evening of the first rehearsal. "To act with real men! At school, you know—well, at school we didn't have any real men."

The "real men" laughed. There were three of them. Two were old friends and admirers of Polly. The third, Bradley Rogers, she approved the moment he was introduced to her.

"Well," asked Polly eagerly, looking over the prim and proper "her hand," "which of you is my lover?"

Solemnly, with hands on their hearts, all three bowed.

"You are all very silly," said Polly, blushing. "Now, please, be serious. Which of you is to be Captain Wheeler, Claire's lover, absent on the field?"

"I am cast for that unfortunate part," Bert Crawford answered. "Unfortunately," queried Polly, and she raised her pretty eyebrows laughingly.

"Unfortunately," Bert hastened to explain, "because I am in the field for two whole acts, you notice, gives these other fellows too much chance to cut me out."

"Oh," smiled Polly graciously. "Then Mr. Marshall and Mr. Rogers are rivals for my hand, too—Claire's hand, I mean."

"No; haven't the pleasure," sighed Jim Marshall. "I'm only your brother."

"Never mind, Jim," said Polly contentedly. "I'll be a real sweet sister to you. And what are you, Mr. Rogers?"

"Your father," answered Rogers laconically.

Polly found the admission exceedingly amusing.

"But what possible chance do my father and brother have of cutting you out?" she asked Bert suddenly.

"Oh," explained Bert carelessly, "I mean they'll cut me out with the audience. No chance to win any bouquets and that sort of thing."

"But you'll win me. I mean—what's her name?—Claire."

"Oh, I'll come out strong in the first act," Bert returned confidently, at which Jim shot him a look that escaped Polly's notice. It did not escape Rogers' observation, however, and he smiled at the thought of the fun to come behind the scenes.

"Who's to be my girl chum, Natalie?" asked Polly, again consulting the printed cast.

"Mrs. Rogers," Bert answered. "And she'll be doubly in that part too. Where is she tonight, Brad?"

"Couldn't come. The baby had the croup or something or other."

Polly wheeled around suddenly on the piano stool and faced Rogers.

"Do you mean to say," she asked accusingly, "that you don't know what's the matter with the baby?"

Rogers, taken by surprise, looked very much embarrassed.

He began to stammer an explanation, but got no further than "Well, you see, Miss Rogers," when the "prompter" arrived and the reading over of parts and the studying out of stage business began in earnest.

As the rehearsal of the play progressed Polly found them absorbing beyond all her expectations. As it happened, Mrs. Rogers, owing to the baby's illness, had not been able to take the part of Natalie after all, and Elsie Williams, Polly's intimate girl friend, was prevailed upon to try it.

This change in the cast, simple as it seemed, was the cause of other changes far less simple.

For one thing, Bert Crawford, whom Polly had grown through force of habit to regard as one of her most effective satellites, suddenly vanished from the scene. He was replaced by a very dangerous speed around Polly's friend Elsie.

Now, Polly ought not to have resented this, for she knew very well in her heart that she never intended Bert to develop, so far as she was concerned, into anything beyond an obsequious and ornamental attendant. However, since he was her lover in the play, it piqued her not a little to have him constantly missing his cue while making love to Elsie behind the scenes instead.

On one of these embarrassing occasions Jim Marshall came to the rescue with what seemed to him nothing sort of an inspiration.

"See here, Polly," he exclaimed joyfully as Polly, alone in the center of the stage, impatiently waited the dramatic entry of Captain Wheeler after his "absence in the field." "I've got a simply corking idea. Bert and I will change parts. You see, off the stage he's Elsie's lover, and on the stage he's yours. Now, why not fix it as it really is and let me be your lover on the stage as well as off? Don't you think that would work out well? I'd be on hand for this scene, you can bet your life!"

lace enough in his arms. You just jump away as if you'd been shot."

Polly made up a comical little face and tried the scene over again.

"No," sighed the prompter. "That wasn't any better. Now, at you've rushed into Captain Wheeler's arms, Miss Noyes, just stay until you're comfortable."

There was a general laugh at this, and then Jim Marshall came forward, as usual, with an original suggestion.

"I don't believe it's all Polly's fault," he said. "Just let me try the scene with her, and then Bert can see how it ought to be done."

But Polly scowled the offer.

"I'll try it with Mr. Rogers," she said archly. "You see, he's perfectly safe."

The about that went up at Bradley's expense did not daunt him.

"Everything comes to him who—in modesty," he paraphrased good naturedly.

So Polly tried the affectionate welcome home scene with Bradley—and a strange thing happened. In each of the many times she had rushed into Bert Crawford's arms she had felt embarrassed and conscious. Her one impulse was to tear herself away again. But when Bradley's arms closed about her she felt a strange thrill of happiness, and as she looked up into his face their glances met in the discovery of an unguessed secret.

"There," exclaimed the delighted prompter, "that's something like it. Now try it again with Mr. Crawford, Miss Noyes."

But Polly wouldn't.

"I'm a little out of the scene," she said laughingly, determined that no one should guess how madly her heart was beating. "I'll do it all right the night of the performance truly. Now, come on, Mr. Rogers; you're my father again now, you know, and I've got to leave you into letting me marry Captain Wheeler. I'm going to be most irresistibly persuasive tonight—to make up for my failure in the last act," she added slyly.

And she was irresistible. Twice Rogers forgot his cue, so fascinated was he by the girl's smile.

At length came a resting space, and Polly and Rogers found themselves alone in the music room.

"What did you mean, Miss Noyes," inquired Bradley half jokingly, half seriously, "by saying I was 'perfectly safe'?"

Polly blushed scarlet, though her tone was indignantly defiant.

"Why, that you're married, of course."

For a moment Bradley looked absolutely nonplussed; then he burst out laughing.

"Well," queried Polly, doubting her senses.

"All the world's men evidently become a stage with you, Miss Noyes," he answered, smiling at her absurdly.

"Of course," said her father in the play. "I'm married, but as you—Mrs. Rogers, I'm a single man, on honor."

"Then who are Mrs. Rogers and the baby?" demanded Polly, not yet convinced.

"My sister-in-law and child," Bradley answered. "Surely you didn't think I was married, did you?"

"But I did!" broke in Polly. "I thought so all along from the night of the very first rehearsal. If I'd known," she broke off suddenly in confusion.

"If you'd known?" repeated Bradley, looking straight into her eyes.

They heard the prompter calling them.

"Goodness," exclaimed Polly, "we're missing our cue. Come on, daddy," she added mischievously.

Polly entered with a flourish, turned toward Bradley, who followed with his hastily assumed old man manner, and held out her arms to him appealingly.

"Well, will you let me marry the man I love, won't you, daddy? Do say yes," she pleaded.

"Bradley gave his reluctant paternal consent, and Polly threw her arms about his neck affectionately, his hand self under the table. The table was small and the terrified fugitive some-thing very lengthy.

The commander of the pursuing party rushed on the stage and fell over the legs of the man he was searching for.

WESTERN CANADA FACTORY 191 Notre Dame Ave., Winnipeg.

Kaiser's Ready Revolver. Emperor William II. is never without his revolver, and he is extremely skillful in the use of the weapon. It is inspected and freshly primed every morning, so that he is sure it is in perfect working order.

Firmly convinced that he is going to die by the hand of an anarchist, Kaiser's Ready Revolver is the only one of its kind that is determined to make a last fight for his life, and to have at his disposal the satisfaction of falling in the arms of a friend.

A Pill for All Seasons—Winter and summer in any latitude, whether in torrid zone or Arctic temperature, Parrot's Vegetable Pills can be depended upon to do their work. The dyspeptic will find them a friend always, and therefore, a quality in every-where. They are made to withstand any climate and are warranted to keep their freshness and strength. They not grow stale, a quality in every-where. They are made to withstand any climate and are warranted to keep their freshness and strength. They not grow stale, a quality in every-where.

She—The idea of 'im a-tellin' me 'ow children ought to be fed! Why, 'ow I buried ten of my own!—The Father.

SLEEPING DRAUGHTS AND SOOTHING MIXTURES.

A wise mother will never give her little one a sleeping draught, a soothing mixture, or opium of any kind, except upon the advice of a competent doctor, who has seen the child.

All these things contain deadly poison. When you give your baby or young child Baby's Own Tablets you have a guarantee of a government analyst that this medicine does not contain one particle of opiate or narcotic, and therefore cannot possibly do harm—but always do good.

Mr. Geo. M. Kempt, of Carleton Place, Ont., writes: "I have given Baby's Own Tablets to my baby since he was two weeks old. He was very small then, but thanks to the Tablets he is now a big, healthy boy."

Sold by medicine dealers or by mail at 25 cents a box sent by post. Write to Williams' Medicine Co., Brockville, Ont.

"Why do you wish to be a street car conductor when you grow up, my boy?" asked the minister.

"Because they always have such nice, dirty hands," said the small boy who observed them.—Detroit Free Press.

The person who has once experienced the pleasure of a cup of delicious chocolate, feeling him- self satisfied that its purity and flavor guarantee, is not easily persuaded to accept a substitute.

In an amateur play a fugitive from justice was supposed to have escaped by the introduction of his hand under the table. The table was small and the terrified fugitive some-thing very lengthy.

The commander of the pursuing party rushed on the stage and fell over the legs of the man he was searching for.

Picking himself up and ludicrously rubbing his shins, he convulsed his audience by exclaiming in true dramatic style:

"Ha! ha! The dastardly villain has eluded us again!"

Minard's Liniment, used by Physicians.

The First Coins.

While the first actual coining of money is attributed to Phidias, king of Argos, in 850 B. C., it must not be supposed that there had not existed a great appreciation of the value and uses of money for centuries previous to the introduction of coinage.

The ancient Egyptians had a gold and silver standard of currency, and their money was in the form of gold and silver ornaments, pendants and pendants, the purchasing value of which depended on their weight. The Greeks introduced something on this system by first marking the weight on gold and silver nuggets so that, if found, they could be necessary to reweigh them every time they were to be used for purposes of exchange or trade. Then came the introduction of gold, silver and copper nuggets of graded uniform sizes and value. The next step was the molding and stamping of disks made from the precious metals. Some of these first coins were stamped with the head of a deity to discourage the greedy from attempting to accumulate and carry around too many of them. There were copper coins as large as dinner plates. While the idea was based on a brilliant motive, it had to give way before the demand for smaller and more convenient forms of currency, and the giant pennies soon dwindled in size to meet the popular demand.

A THOUGHTFUL HUSBAND.

Roses, Red Roses, and Twas Dr. and Mrs. Jason's Wedding Anniversary.

"Well, well! What does all this mean?" Brown nodded toward the sign which of gorgeous roses that lay on the table in the doctor's office.

"Dr. J.," replied the doctor, coming in and shaking hands.

"Oh, P.," What does that stand for?" "Grateful patient."

"Oh, yes, of course," Brown looked across at the doctor quizzically and added, "A lady, I presume?"

"The doctor was a married man, but he was a favorite among the fair sex. (His wife was aware of it, too, but not approvingly so. In fact, it was common gossip among their friends that he did not view the numerous visits of Dr. J.'s wife to his office with any degree of complacency.)

"Yes, a lady," answered the doctor. "A story behind it, I suppose?" commented the doctor.

"Yes, in a way," said the doctor. "She was my patient several years ago. She lives out of town now, but every time she visits the city, she never fails to send around a bunch of these roses."

"Um," said Brown. "She is simply showing her gratitude, and then the roses are a decorative touch to the office, you know," explained the doctor.

"Um," said Brown. "Mrs. Jason is pleased to have your great appreciation in this way, I have no doubt."

"Oh, yes, oh, yes," said the doctor hastily. "But, say, old chap," he said, placing his hand confidentially on Brown's sleeve, "I wouldn't bring up the subject when you come around to the house, you know."

At this moment a step was heard outside the office door, and it opened to reveal Mrs. Jason, who stepped into the room with a glance, greeted Brown pleasantly, and then her eyes fell upon the sign of the roses.

"She's about to tell me," she exclaimed, gathering the roses in her arms, and then she turned to Brown with a beam of contentment. "You were just about to send them up, I'll bet. Of course they are for me! And I have been reproaching you all the morning for not having sent them sooner."

"Of course," said the doctor, "I have been reproaching you all the morning for not having sent them sooner."

"The doctor became a new man in appearance on the instant."

"Of course," said the doctor, "I have been reproaching you all the morning for not having sent them sooner."

"Well, well!" murmured the old gentleman who overheard her. "Now I know what is meant by the term 'a reigning belle'."

Public Cooking.

To buy one's own fowl or joint and watch it being roasted at a public "roastery" at the rate of 5 cents a pound is a privilege possible for New Yorkers to enjoy. This method has all the elements of novelty to attract the inhabitants of bachelor apartments and the young couples playing at light housekeeping in limited quarters. Capon, quack and sweetbreads may be cooked here without fear of exchange for an inferior article, as the suspicious housekeeper is invited to sit down and watch her purchase being roasted on the automatically revolving spit. When done to a turn he properly is delivered to her in a neat box, which she tucks under her arm.—New York Sun.

The Australian Way.

Owing to the Australian way and cheapness of meat in Australia restaurant keepers have for years been able to give astonishingly liberal meals for 12 cents. But they are not satisfied with the margin of profit, and they have decided in conference to raise the price to 14 cents. One of the reasons assigned for this step is the "abnormal appetites" of their customers. It is the hospitable custom in Australian popular restaurants not to charge for a second helping of anything, and you can have as many cups of tea as you please after having paid for the first one. It is the freedom with which this privilege—unknown in America—is exercised that cuts down the profits.

Enormous Ones to Be Built by the French Government.

The French war department is actively pushing the construction of the new dirigible La Republicaine and is expecting to have this new aerial warship ready in May. The 1908 budget includes the construction of two dirigibles of like size, and when these are completed the government will undertake to build several larger airships of twice the size. The plans for the first of these have been drawn up recently by the Lebaudy brothers and submitted by each major. In case of a breakdown of either of the engines the other is sufficiently powerful to drive the airship to its destination.

There are also two other dirigibles mounted on vertical shafts for the purpose of obtaining stability under the most adverse conditions. The envelope will be constructed of waterproof fabric supported upon a rigid frame in a similar manner to that of the Zeppelin airship, while the balloons to allow for expansion and contraction will also be rigidly constructed. It is proposed to use the motor boat Panhard-Tellier, which has its engines already installed, as the body part of the new French dirigible. It is expected to obtain a speed of sixty kilometers (37.28 miles) an hour. The lifting power of the new airship will be in the neighborhood of eight tons—Scientific American.

HOW EFFECTS THE COMPLEXION

AUTOMOBILING in the early spring is undoubtedly injurious to the complexion, for the breezes are not soft and the dust is irritating to the skin. It would be a pity, however, for the girl who cares for her complexion to altogether eschew the sport, and there are many things that she may do to render the trip harmless.

Naturally, when one goes for an afternoon spin in a motor, the wind and the dust would not be enough to cause any bad effect whatever upon the complexion, but so many people nowadays take such long trips, regardless of wind and weather, and the treatments suggested are for these: for no girl wants to acquire a typical "motor skin"—a harsh, coarse complexion that soon takes all the youth from her face.

Before starting on the trip some good cold cream should be massaged well into the skin with a rotary motion, always working upward and outward from the corners of the mouth. This keeps the wind from drying too much the complexion and from biting into the skin.

A very satisfactory cream for this purpose is made of four ounces of sweet almonds, six drams each of white wax and spermaceti, two drams of borax and one and one-half ounces of glycerine, two ounces of orange-flower water and fifteen drops each of oil of neroli, of bigarade, of petit grain.

Melt the first three ingredients, add the glycerine to the orange-flower water and dissolve the borax in the mixture. Then pour it slowly into the blended oils, stirring continuously. This is a skin food, and one that has a cleansing effect.

The massaging has given the complexion a tonic—a help to withstand the incessant breeze made by the swift motion—but the last act, before tying on the veil, should be to powder the face, giving it as far as possible an extra coating. Next the veil, and the girl is ready to face anything.

But the care of her complexion is not yet complete; for, when she comes home, the dust, has made her face smart—it is caused by such strong breezes—and she must dampen cloth in whiskey and lay them on her face; while, the whiskey is healing the skin she should lie down, relaxing so that

Massage With Cold Cream Before Going Out.

the muscles and tiny tendons may have complete rest, thus avoiding wrinkles and crow's feet. The dampened cloths should stay in place for quite five minutes—to give the tonic an opportunity to soak well into the skin—then a good steaming will quite remove all traces of the dirt and tiny particles of sand, giving the face a clear, smooth appearance. Last of all, rub in a very little cold cream, working carefully off and apply a little powder.

These various treatments may seem formidable; they might, to some, take away all the pleasure of motoring; but in later years, when wrinkles come, when the face becomes set into the expression one naturally assumes when facing the sun, the woman who has neglected her complexion will be very sorry she did not seize the opportunity when she could, with the expenditure of a little time and pains, have preserved the freshness of a youthful complexion.

The Powder is the Last Touch.

Aids to Health and Beauty

OWING to the great amount of mail received and the limited space given this department, it is absolutely impossible to answer letters in the Sunday issue following their receipt. The letters must be answered in turn, and this oftentimes requires three or four weeks.

All correspondents who desire an immediate answer must inclose a self-addressed stamped envelope for a reply. This rule must also be complied with in regard to personal letters.

Care of the Teeth
CURIOUS—The teeth may be preserved to a good old age if properly taken care of. Sudden extremes of very hot or very cold food or drink jar upon the teeth most injuriously and should be avoided; the teeth should be cleaned twice a day—on rising and before retiring. The brush should not be too hard, and one should not stop at brushing only the outside surface of the teeth, but should brush them inside as well.

Here is a recipe for a simple and non-injurious tooth powder: Precipitated chalk, four ounces; powdered orris root, eight ounces; powdered camphor, one ounce. Triturate the camphor in a mortar, moistening it with a very little alcohol. Add other ingredients. Mix thoroughly and sift through a fine bolting cloth.

Henna Hair Stain
P.—The henna stain gives the hair a reddish tint. To make it, take one ounce of henna leaves; steep in a pint of boiling water for twenty minutes. Let stand until it gets cold. Strain the liquid. Apply to the hair by the aid of a small sponge. The henna will sometimes stain the scalp, but the stain can easily be removed by soap and water.

Blisters and corns are due to improperly fitting shoes, and one should do everything to prevent them. Have the shoes and stockings a trifle too long for the feet, so as to relieve the pressure on the toes. Soak the feet night and morning; wipe dry and rub with a mixture of one tablespoonful spirits of turpentine and (equal parts) of turpentine and sweet oil (one to three parts) until the soreness subsides. Dust between the toes with talcum powder and place a little cotton between toes, so as to absorb any moisture.

Lotion for Oily Skin
MINTA—If the skin is the least bit greasy, never use any cream on it, for this will make matters worse instead of improving them. Apply this lotion to the face once a day: Boracic acid, one dram; distilled water, half a pint; rosewater, two ounces.

Hardening Pomade
ANXIOUS—This pomade is to be used after massage. Simply rub a little over the flabby skin and allow it to remain

on all night. Oil of sweet almonds, six ounces; white wax, three ounces; tincture benzoin, one and one-half ounces; rosewater, one and one-half ounces; pulverized lanolin, six drams.

The roughest, hardest, reddest hands are in a short time made smooth, soft, white and beautiful by the following treatment: Every night keep the hands in warm water, washing them with good soap, rinse in clear water and dry thoroughly with a soft towel, and in doing so rub the hands from the tips of the fingers backward. Next rub a little

cleansing cream well into the skin, and allow it to remain from five to ten minutes, then take a dry, soft cloth and remove all the cream possible. This will remove all the dirt from the pores. Then apply a skin food, which should be left on all night.

To Fatten the Neck
P. R.—To make the throat full and round, the best exercise is to bend the head slowly forward until the chin touches the neck, and then slowly raise the head to its normal position. Repeat these movements until you are tired.

Then bend the head as far backward as possible. Sitting erect in a chair, bend the head from one side to the other, and then roll the head to the right, left and forward. Another good position is to let the arms hang loosely at the sides. Raise the shoulders as high as possible, then forward, down and backward until a circle is formed. Continue this for a time, and then reverse the motion. Do this every day for five or ten minutes.

Again, stand perfectly erect with the arms at the sides, lift them up vertically, inflexing the lungs as the arms ascend. At the same time rise up on the tips of your toes and throw your head back, at the same time touching the backs of the hands overhead. As the arms slowly descend exhale from the lungs.

Treatment for Bunions
BONE FOOT—Get a bunion plaster from the druggist and stick with the scissors around the inside circle or opening. Moisten the plaster and put it over the bunion. Put a small wedge of felt between the great toe and the second toe, which will throw the foot more into shape. It will greatly relieve the pressure of the joint.

Draw the stocking on carefully. When you put your shoe on you will discover that the entire joint does not begin to show as much with the plaster on as without. And all pain and irritation are prevented by wearing the plaster, which makes it impossible for the leather to come in contact with the sore joint or irritate it.

Skin is Too Dry

MARY—Cucumber cream is just as beneficial as any cold cream and is excellent for the drawn feeling of the skin. Here is the formula: Ripe cucumbers, one-half pint; denatured alcohol, one and one-half ounces; sweet almond oil, three and one-half ounces. Shave cream, one dram; bleached almonds, one and three-fourths drams. This is a suave lotion, very whitening, softening and cleansing.

Gymnastic exercises faithfully practiced will rejoin the symmetry of your figure. Go to some gymnasium under the supervision of a competent instructor and follow the exercises prescribed.

To Make Cosmetic Gloves
SOCIETY—Use soft, large, leather gloves, three or four sizes too large. Rip them open and spread the inside with one of the following preparations; then sew the ripped seam up. The simplest, and, therefore, the least troublesome, paste to make is this: Pine tar (refined), one teaspoonful; olive oil, one pint.

Melt in a water bath, scented with rosewater or some other perfume. This is a preparation which does not spoil. The following preparation for use with cosmetic gloves is slightly more elaborate: Myrrh, one ounce; honey, four ounces; yellow wax, two ounces; rosewater, six ounces. Melt the wax in a water bath and add the myrrh to it while it is hot. After beating them together, add the honey and rosewater. Heat all up and add glycerine by the teaspoonful until you secure a paste which will spread nicely.

For the Complexion
MRS. A. M.—A teaspoonful of the tincture of benzoin to an ounce of rosewater forms a well-known lotion which is excellent for whitening the skin. Apply this to the face before retiring and use it on all nights.

If the face burns and smart after it has been washed, massage a good cream well into the skin. The following is the formula for an excellent cream: Oil of sweet almonds, four ounces; white wax, six drams; spermaceti, six drams; borax, two drams; glycerine, one and one-half ounces; oil of petit grain, fifteen drops; oil of bergamot, fifteen drops.

Melt the first three ingredients and add the glycerine to the orange-flower water and dissolve the borax in the mixture; then pour it slowly into the blended oils, stirring continuously.

AMATEUR FENCING

The Attack

FENCING, now become so popular with women, has proved itself to be beyond all other exercises the thing to teach self-reliance, agility, suppleness, while the muscular strength, the brain keenness and the eye

The Attack

a marvelous quickness—an instantaneous focus. All of which is useful in daily life and extremely desirable for nothing equips a woman or man more attractive than general alertness, mental or physical.

Outside My Range

DEBT—Your question can hardly be answered through these columns, as it does not deal with the health or beauty question. However, if you will send me a self-addressed stamped envelope I will gladly reply to your letter.

Superfluous Hair

MISS TIGBY E.—For the superfluous hair on the arms use the following recipe: Sulphuric acid of soda, 100 grains; chalk, 200 grains. Mix thoroughly and keep dry in well-corked bottle until wanted for use. Take enough to make a paste, and add warm water to it until the proper consistency is secured. Spread over the hairy surface, and allow to remain for from one to five minutes, according to the nature of the growth and the susceptibility of the skin; then scrape off with a blunt blade—a paper knife, for example. It should be removed, as in every case with a depilatory, when the burning sensation is produced. Too long contact with the skin should be avoided, and immediately after the hair has been removed the denuded surface should be gently washed with warm water and cold cream or a bland oil applied to prevent irritation.

I would not advise a girl of your age to reduce the size of her bust. Wait until your form has fully developed and give nature time to do her work; then, if you find you would like to improve your figure, it will be advisable to use any of the formulas printed in these columns.

Ointment for Scant Eyebrows

JENNIE—The recipe I am about to give for the eyebrows is also good for the eyelashes. Apply with a tiny toothbrush—once a day, until the growth is sufficiently stimulated, then less often. Be very careful when applying the ointment that none of it gets into the eyes; if it will, like any other oil, inflame them. Oil of lavender, fifteen drops; oil of rosemary, fifteen drops; tincture of cantharides, two drams; vaseline, two ounces.

For Brittle Finger Nails

M.—Take equal parts of refined witch and myrrh or of turpentine and myrrh melted. Mix together and spread upon the nails at night. Remove in the morning with a little olive oil. This paste will nourish the nails and make them stronger.

Try the following treatment for the blackheads: Tincture of green soap, two ounces; distilled witch hazel, two ounces. Let this mixture stay on only a few moments; then wash off with hot water.

If the green soap irritates the skin, as it sometimes will, use it, every other day. Apply a cold cream.

Green soap may be purchased at any drug store. It is not a regular "cake soap," but it is about the consistency of custard.

Open each seed acne with the point of a fine cambric needle. The hardened mass must be pressed or picked out. The empty sac of the gland should then be washed with a little toilet vinegar and water, or with a very weak solution of carbolic acid and water. Sterilize the needle before using it, by dipping into boiling water, as the use of any instrument, unless the skin, as well as the needle, is thoroughly cleansed, is always dangerous.

Snow of Cucumbers

REGGY—For the freckles use this mixture: Two small cucumbers, four ounces olive oil, two ounces lanolin, one dram white wax, one dram spermaceti. Heat olive oil. Slice up the cucumbers, not removing the peel, and place in the oil. Leave for twenty-four hours. Strain.
